

The Micah Project

November

Album

Old House, New Ministry

Missionary Stephen Kusmer has long felt a special burden for the older teenage street guy population -- those who are beyond the age limit to enter the Micah Project and who truly don't have a good option should they desire to leave the streets and pursue a new life. Stephen's long time dream to use our old facility as a discipleship/ rehabilitation home for these boys is becoming a reality. Over the past couple months Stephen, along with a crew of young, passionate Christians from the Villa Linda Miller who are graciously volunteering their time and energy to help, have been inviting a group of 5 of the street guys to hang out, take classes, and refurbish the old Micah house a couple times a week. Amidst the chaos of street life, these times of fellowship are a safe space for these guys to know their heavenly Father more intimately, find healing, and start to dream of something greater for their lives.

"Micah 1.0 is a place where, against all odds, hope is born in the hearts of these young men. So I invite you to come follow the journey of these past few months and to believe along with us that our God is doing something beautiful in the lives of these guys!"
--Stephen Kusmer

Graduation

Graduation is one of the most important days of the year for the Micah Project.

Our boys have had so many barriers in their lives during the years that they should normally be receiving an education. But at Micah, they begin to move forward... and not look back!

Our four high school seniors: Pedro Luis, Yoel, Moisés and Nefy were able to stand before the two hundred people that came to their graduation and say: "Look what the Lord has accomplished in our lives. Just wait and see what's next!"

In Other News...

November brought us some incredible new life to the Micah house— including new faces, a new gate, and some new artwork!

A.

We are so blessed to have two new additions to the Micah family: Junior and John! We have had a relationship with these boys since living at Micah 1.0, and we are so grateful to finally have them in our home!

B.

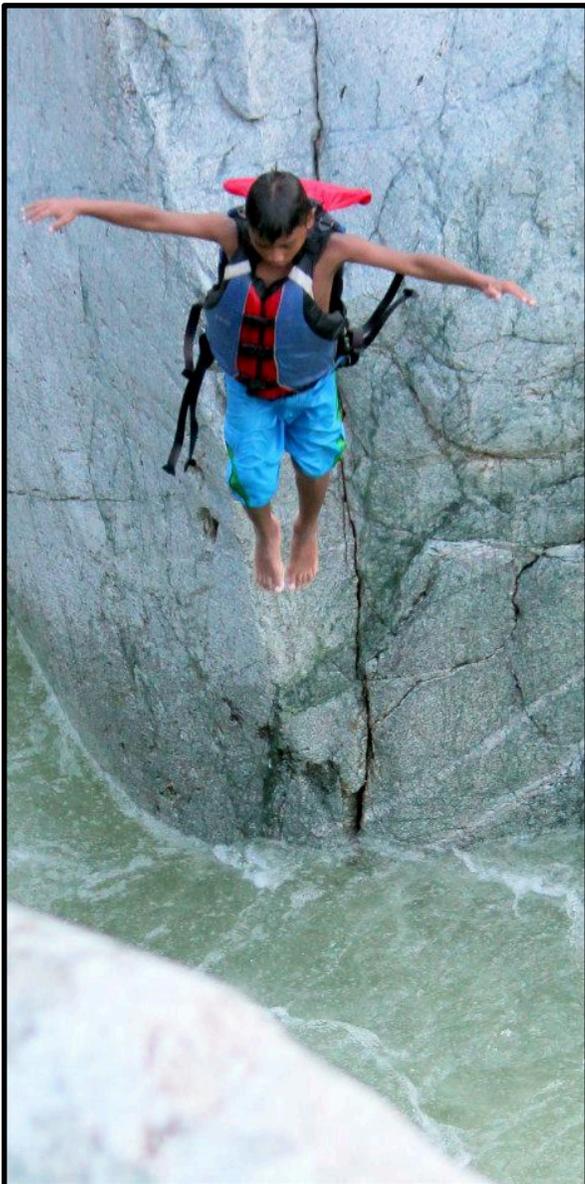

Thanks to the Embassy of Taiwan for their generous donation, we now have our new entrance!

C.

Hector poses with just one of the many incredible pieces of art the boys created for their Art Show display at this year's graduation.

Adventure Time!

Thanks to some dear friends underwriting our adventure, we were able to take a trip to La Ceiba! During our time at Jungle River Lodge, the Micah boys showed their courage by braving the raging rapids, jumping off cliffs, and hunting for crabs. Many of the boys who were initially reluctant to try some of these activities faced their fears after receiving encouragement from their brothers.

Trip to Roatan!

The same dear friends that sent the entire project to La Ceiba also sent a few of us to Roatan Island for a few days!
